

REFERENCE – Vincent Dirks

Vincent Dirks worked in my team from Dec 2014 until Aug 2016. I was the Delivery Manager for Trade Me Motors and he was a Senior Test Analyst reporting into our Test Chapter Lead.

Vincent is an extremely dedicated and passionate individual who was always striving to learn new things and then share those learnings with those around him.

He always wanted to understand every aspect of the cases we were working on, and therefore be extremely thorough in his testing in an attempt to mirror the large amount of traffic that Trade Me receives.

He has good technical skills which means that he was one of our leaders in our quest for more automated testing.

He was a fantastic member of the Trade Me test community and was a key element in them bonding and learning from each other across all of our business units.

He could be suited to a team lead role as coaching and mentoring is an area that he is very interested in and has shown an aptitude for.

If you would like more detail on these or any other points related to Vincent, please feel free to give me a call.
